### Quest of the Giant J

The Most Interesting Giant J Goldmine In The World Reveals:  
The Legendary Jesse James, Secrets Of The Knights Templar & Confederate Treasures, &  
The Lost Gold Mines Of The American West

The Quest of the Giant J details how Ben Miller's bloodline thru his Jackson & James ancestors that were Colonels and Generals created the USA's most powerful secret spy network prior to the creation of the CIA. It tells the amazing truth about how they built the Federal Reserve with gold from the Jackson family gold mine. The book also covers how Ben's music was pursued by Warner Bros and how he wrote this book while simultaneously co-writing and co-producing

music with Neil Young's publicity manager a former Senior VP of Warner Bros Music.

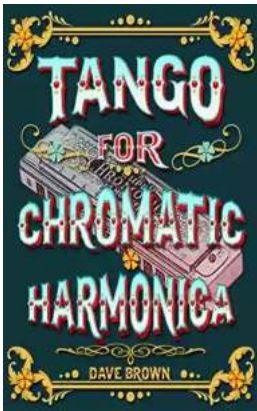

For the very first time the true identity of Jesse Woodson James is revealed and the multiple Jesse James theory is expanded on in detail by a 4th great grandson which researchers have stumbled over for over a century. The activities of Jesse Woodson James after his faked death hoax are also revealed with a unique inside look into his connection and leadership of the secret military group Knights of the Golden Circle and the Knights Templar. The relation between General Andrew Jackson and General Thomas Jonathan "Stonewall" Jackson is also expanded on from another Jackson cousin's perspective linking all three paternal genealogy lines to medieval knight Sir Richard Jackson in the 1500's.

Perhaps the most intriguing aspect of this book is the in depth analysis into the lost gold mines and mineral patents of the American west. The lost mineral patent issue details a true story of adventure and intrigue exposing judicial, county, state, and federal government corruption across the western frontier. One man with courage and unique information uncovers the biggest mortgage, title, and mineral fraud in US history that has been working in tandem with mega corporations and lobbyists for over a century to control the supply and demand of gold.

This unique book is a treasure map of knowledge to help others discover their genealogical history and lost family mineral wealth that has been hidden since the days of the last gold rush over 100 years ago. Thousands of federal mineral patents were issued between 1840 and 1910 and would still be owned by the unknowing next of kin descendants today. The federal mineral patents cannot be legally assessed property taxes by the county and therefore are still sitting out there waiting for you to discover. Did your ancestors settle a federal mineral patented gold mine? As some people have pointed out this would change history and start a new gold rush! Meanwhile the value of gold has been steadily growing for decades. This story eventually evolved into a screenplay as Ben acquired a

literary agent that showed great interest in his Templar connection and was a 32nd degree master Freemason himself who had already made around 200 movies throughout an extensive career including the 4 star classic Cool Hand Luke starring Paul Newman. A man inherits the one and only goldmine shaped like a giant J and then finds out he is the 4th great grandson to Jesse Woodson James, a 6th cousin to General Stonewall Jackson, and a 7th cousin to the 7th President General Andrew Jackson.

While these enclaves, which are used for all the many Federal governmental purposes, such as post offices, arsenals, dams; road; etc., usually are owned by the Government, the United States in many cases has received similar jurisdictional authority over privately owned properties which it leases, or privately owned and occupied properties which are located within the exterior boundaries of a large area (such as the District of Columbia and various national parks) as to which a State has ceded jurisdiction to the United States.
