This illustrated volume was published in 1911.

Excerpts from the by Colonel Theodore Roosevelt:

Shortly after returning from this trip along the Orinoco and the Magdalena, Doctor Mozans called upon me, and we soon grew to be great friends. He is a devoted student of Dante, and I am one of the innumerable laymen who greatly admire Dante without having even the slightest pretensions to having studied him. I think that the intimacy of Doctor Mozans and myself was largely due to his finding out the interest I had taken in translating, so to speak, Dante's political terminology into that of the present day — for Dante wrote with a lack of self-consciousness which we could not nowadays achieve, and so, in perfect good faith, and I may add with entire propriety, illustrated the fundamental vices and virtues by placing in hell and purgatory the local Italian political leaders of the thirteenth century side by side with the mightiest figures of the elder world, the world of Greece and Rome at their zenith.

The acquaintance thus begun went on, and when I was about to leave the "White House, Doctor Mozans proposed that I should make a South American trip with him, instead of my proposed trip to Africa. I should have been exceedingly pleased to have done both; but as my trip was to be taken primarily as a naturalist interested in the great game, I thought it best not to change my point of destination — and the comments Doctor Mozans makes upon the rarity and shyness of all large animals in the tropical forests of South America show that I was wise. But Doctor Mozans would have been an ideal traveling companion. His trip was one of absorbing interest, and it is told so delightfully that I do not now recall any similar book dealing with South America so well worth reading.

Doctor Mozans has every qualification for making just such a journey as he made, and then for writing about it. He is an extraordinarily hardy man, this gentle, quiet traveler. He has that sweetness of nature which inspires in others the same good feeling he himself evinces towards them ; he loves rivers and forests, mountains and plains, and broad highways and dim wood trails ; and he has a wide and intimate acquaintance with science, with history, and, above all, with literature. This volume supplements his previous volume, giving his journey across the Andes from the West Coast and his voyage down the Amazon; so that he has seen all that is most characteristic, and to the traveler most attractive, in tropical America, from the barren Andean plateaus, filled with the ruins of a dead civilization almost as ancient and interesting as that of Egypt or Mesopotamia, to the hot, steamy, water-soaked forests which cover the middle and the northeast of the Southern continent. We are fortunate in having a man like Doctor Mozans . traveling in the lands to the south of us. He speaks with just admiration of the great work done by Secretary Root, when, in an American warship, he circled the Southern continent, representing our country as an ambassador whose work was of highest moment.

In closing, I can only repeat again that this is a delightful book from every standpoint. It is an especially delightful book for Americans because throughout it Doctor Mozans shows that he is so thoroughly good an American, so imbued with what is best in our National spirit, and with the thoughts and aspirations of our great est statesmen and writers, and indeed of all who have expressed the soul of our people. He is peculiarly fit to interpret for us our neighbors to the south; and he describes them with a sympathy, insight and understanding granted to but few.

Moreover, his feat was a really noteworthy feat, and it is told with vividness, combined with modesty, and an evident entire truthfulness; and we should be equally attentive to what he sets forth as our accomplishments — for example, in digging the Isthmian Canal and bringing order to Cuba.
