

One Billion Americans: The Case For Thinking Bigger

The United States of America has always been a land of big dreams, big ideas, and big accomplishments. From the founding fathers who envisioned a nation built on liberty and justice for all, to the pioneers who explored new frontiers and pushed the boundaries of human achievement, Americans have never shied

away from thinking big. But now, more than ever, it's time for us to take this mindset to the next level. We need to start seriously considering the idea of One Billion Americans.

What does it mean to think bigger? It means reimagining what our nation can achieve and embracing a bold vision for the future. It means moving away from a scarcity mindset and instead focusing on the incredible potential that comes with a larger population. It means recognizing that our country is uniquely positioned to lead the world in innovation, economic growth, and cultural influence.

One Billion Americans: The Case for Thinking

Bigger by Matthew Yglesias (Kindle Edition)

So why should we aim for One Billion Americans? The reasons are many, but let's start with the economic benefits. A larger population means a larger workforce, which translates to more productivity, innovation, and economic growth. With a billion Americans, we would have the ability to generate unprecedented levels of wealth and prosperity. We could create more jobs, expand industries, and attract global investment like never before.

Moreover, a larger population would also strengthen our national security. A bigger military force would deter potential adversaries and ensure that America

remains the most powerful nation on Earth. It would enhance our ability to protect our interests abroad and safeguard the values we hold dear. In an increasingly interconnected world, a billion Americans would give us the strength and influence necessary to shape the global agenda according to our interests and values.

Thinking bigger also means addressing some of the pressing challenges we face as a nation. Issues like climate change, healthcare, and infrastructure require bold solutions. With a larger population, we would have a greater talent pool to tackle these problems head-on. We would have the brainpower and resources needed to innovate and implement transformative policies that can make a real difference. One billion Americans would ensure that our nation remains at the forefront of progress and innovation for generations to come.

Of course, some may argue that a larger population would strain our resources and exacerbate existing problems like congestion, housing shortages, and pollution. However, with a comprehensive and forward-thinking plan, we can overcome these challenges. Investing in infrastructure, improving public transportation, and promoting sustainable development are just a few ways we can ensure that our nation can accommodate and sustain a billion Americans. The key is to approach expansion with a long-term vision and a commitment to smart, sustainable growth.

The case for One Billion Americans extends beyond just economic and security considerations. It is about harnessing the power of diversity and fortifying our national character. America has always been a nation of immigrants, a melting pot of cultures, ideas, and perspectives. By welcoming more people into our country, we can tap into the incredible talent and potential that lies within each

individual. We can build a society that is more inclusive, more vibrant, and more resilient.

It's time for us to start thinking bigger. We must set ambitious goals and strive to achieve them. One billion Americans is not just a number; it's a symbol of our capacity for greatness. It represents a future where America leads the world in all aspects – from technology and innovation to culture and democracy. It's time for us to embrace this vision and work towards it together.

Let's envision a future where One Billion Americans build a thriving, prosperous, and inclusive nation. Let's think bigger and inspire the world with our ambition, resilience, and unwavering belief in the American dream.

One Billion Americans: The Case for Thinking Bigger by Matthew Yglesias (Kindle Edition)

NATIONAL BESTSELLER

What would actually make America great: more people.

If the most challenging crisis in living memory has shown us anything, it's that America has lost the will and the means to lead. We can't compete with the huge population clusters of the global marketplace by keeping our population static or letting it diminish, or with our crumbling transit and unaffordable housing. The

winner in the future world is going to have more—more ideas, more ambition, more utilization of resources, more people.

Exactly how many Americans do we need to win? According to Matthew Yglesias, one billion.

From one of our foremost policy writers, *One Billion Americans* is the provocative yet logical argument that if we aren't moving forward, we're losing. Vox founder Yglesias invites us to think bigger, while taking the problems of decline seriously. What really contributes to national prosperity should not be controversial: supporting parents and children, welcoming immigrants and their contributions, and exploring creative policies that support growth—like more housing, better transportation, improved education, revitalized welfare, and climate change mitigation. Drawing on examples and solutions from around the world, Yglesias shows not only that we can do this, but why we must.

Making the case for massive population growth with analytic rigor and imagination, *One Billion Americans* issues a radical but undeniable challenge: Why not do it all, and stay on top forever?
