

# Quick List Of Extinct Animals And What They Looked Like Extinction Evolution

Extinction is an inevitable part of evolution. Throughout the history of our planet, numerous species have gone extinct, leaving behind only fossils and glimpses into their past. From massive dinosaurs to peculiar creatures that once roamed the Earth, the diversity of extinct animals is both fascinating and mysterious. In this article, we will provide a quick list of extinct animals along with descriptions of what they looked like, shedding light on the wonders of extinction and evolution.

## 1. Dinosaurs

Dinosaurs are perhaps the most iconic extinct animals. These magnificent creatures ruled the Earth for millions of years, with their incredible diversity and size captivating the imagination of people of all ages. From the mighty Tyrannosaurus rex to the long-necked Brachiosaurus, dinosaurs exhibited an array of unique features. With their scaly bodies, sharp teeth, and often intimidating size, dinosaurs were truly a sight to behold.

## It's Too Late to Meet Me : A Quick List of Extinct Animals and What They Looked Like | Extinction Evolution Grade 3 | Children's Biology Books

by Wheeler Antabanez (Kindle Edition)

★★★★★ 5 out of 5

Language : English

File size : 42604 KB

Screen Reader: Supported

Print length : 72 pages

Hardcover : 350 pages

Item Weight : 1.45 pounds

Dimensions : 6.3 x 1.1 x 9.1 inches

## 2. Woolly Mammoths

Woolly mammoths were prehistoric relatives of elephants that roamed the Earth during the last Ice Age. These magnificent creatures were covered in thick fur, adapted to survive in cold environments. With their enormous curved tusks and shaggy appearance, woolly mammoths are among the most iconic extinct mammals.

### 3. Saber-Toothed Cats

Saber-toothed cats, scientifically known as Smilodon, were fearsome predators that once prowled the ancient grasslands. These large felids possessed long, curved canine teeth that extended down from their powerful jaws. They used these teeth to stab their prey, delivering a deadly blow. Saber-toothed cats had a muscular build and were well-adapted for hunting.

## 4. Dodo Birds

The dodo bird is an extinct flightless bird that once inhabited the island of Mauritius. It is known for its peculiar appearance, with a plump body, small wings, and a large beak. Due to its lack of natural predators on the island, the dodo bird lost its ability to fly and had a relatively naïve behavior, rendering it highly vulnerable to human activities. Sadly, the dodo bird went extinct within a century of its discovery by European explorers.

## 5. Tasmanian Tigers

The Tasmanian tiger, also known as the Thylacine, was a unique marsupial that once inhabited the Australian continent, particularly Tasmania. With its dog-like appearance and tiger-like stripes on its back, the Tasmanian tiger also had a pouch like kangaroos and other marsupials. Human hunting, habitat loss, and disease led to the extinction of this fascinating creature in the early 20th century.

## 6. Quagga

The quagga was a subspecies of zebras that once lived in South Africa. It resembled a mix between a horse and a zebra, with a striped front half and a solid-colored rear half. Unfortunately, excessive hunting for their meat and hides led to the complete extinction of the quagga in the late 19th century.

The Earth's history is filled with a diverse range of extinct animals, each with its unique characteristics and adaptations. These extinct creatures provide valuable insights into our planet's rich evolutionary past. While their disappearance is a loss, the study of extinct animals helps us understand the complexities of life and appreciate the diversity of species that have come and gone.

From the mighty dinosaurs to the peculiar dodo bird, each species on the quick list of extinct animals had its place in the intricate web of life. As we continue to uncover their remains and learn more about their appearance, we gain a deeper

understanding of the fascinating world that existed before us. Extinction and evolution go hand in hand, shaping the history of life on Earth.
