It constructs the framework on which musical compositions are built, allowing musicians to convey their deepest emotions through deliberate sequences of beats, rests, and accents.

Rhythm is the fundamental pulse that animates poetry, music, and dance across all cultures. And yet the recent explosion of scholarly interest across disciplines in the aural dimensions of aesthetic experience--particularly in sociology, cultural and media theory, and literary studies--has yet to explore this fundamental category. This book furthers the discussion of rhythm beyond the discrete conceptual domains and technical vocabularies of musicology and prosody. With original essays by philosophers, psychologists, musicians, literary theorists, and ethno-musicologists, *The Philosophy of Rhythm* opens up wider-and plural-perspectives, examining formal affinities between the historically interconnected fields of music, dance, and poetry, while addressing key concepts such as embodiment, movement, pulse, and performance. Volume editors Peter Cheyne, Andy Hamilton, and Max Paddison bring together a range of key questions: What

is the distinction between rhythm and pulse? What is the relationship between everyday embodied experience, and the specific experience of music, dance, and poetry? Can aesthetics offer an understanding of rhythm that helps inform our responses to visual and other arts, as well as music, dance, and poetry? And, what is the relation between psychological conceptions of entrainment, and the humane concept of rhythm and meter? Overall, *The Philosophy of Rhythm* appeals across disciplinary boundaries, providing a unique overview of a neglected aspect of aesthetic experience.
