The concept raises questions about altering history, tampering with the natural order of events, and the consequences of such actions. Striking a balance between personal gain and the preservation of the space-time continuum becomes crucial when considering the implications of time travel.

Additionally, one must also consider the possibility of unintended consequences and butterfly effects. Even the smallest alteration in the past could have unforeseen and potentially devastating consequences in the future. It begs the question of whether the pursuit of love or profit is worth risking the stability of the world as we know it.

## **The Future of Time Travel**

When Nephele has a terrible freshman year, she does the only logical thing for a math prodigy like herself: she invents a time travel app so she can go back and do it again (and again, and again) in this funny love story, Groundhog Day for the iPhone generation.

Fourteen-year-old Nephele used to have friends. Well, she had a friend. That friend made the adjustment to high school easily, leaving Nephele behind in the process. And as Nephele looks ahead, all she can see is three very lonely years.

Nephele is also a whip-smart lover of math and science, so she makes a plan. Step one: invent time travel. Step two: go back in time, have a do-over of 9th grade, crack the code on making friends and become beloved and popular.

Does it work? Sort of. Nephele does travel through time, but not the way she planned--she's created a time loop, and she's the only one looping. And she keeps looping, for ten years, always alone. Now, facing ninth grade for the tenth time, Nephele knows what to expect. Or so she thinks. She didn't anticipate that her new teacher would be a boy from her long ago ninth grade class, now a grown man; that she would finally make a new friend, after ten years. And, she

couldn't have pictured someone like Jazz, with his deep violet eyes, goofy magic tricks and the quietly intense way he sees her. After ten freshman years, she still has a lot more to learn. But now that she's finally figured out how to go back, has she found something worth staying for?
